

Fire sprinkler trainings coming to Medford!

Feb. 21-22 - Fire Sprinkler Plan Review

Feb. 23 - Rough Final Inspection of Fire Sprinkler Systems

Fire Sprinkler System Plan Review (2-Day) on 2/21-22/2024

This two-day seminar discusses how to conduct the plan review process for water-based fire protection systems. Utilizing the requirements of NFPA 13, participants will be guided through an actual review of sprinkler system plans and calculations, discuss the importance of employing a systematic review process, identify the documents required for a complete plan review, and review a submittal of the hydraulic calculations. Discussion points include the process of hydraulic calculations, and identification of the key pieces of information, and the common errors that are made. ***Attendees must bring a copy of NFPA 13 to class or have access to the standard online.***

Rough and Final Inspections of Fire Sprinkler Systems (1 Day) on 2/23/2024

This one-day seminar provides attendees with vital information on how to conduct the field inspections for new fire sprinkler and standpipe systems. Fire sprinklers and standpipes are installed in stages and inspections are required before commencing to the next stage. The codes require periodic on-site inspections as the work progresses, to be installed according to the approved construction documents. This work is required to be inspected and approved before being covered or before the system is commissioned. This seminar points out the visual and physical inspection requirements of the latest codes and standards.

NOTE: You may register for each seminar separately, or for all three days as one bundle. Early Bird registration ends Feb. 6, 2024.

Early Bird Registration for NFSA members: Plan Review only (2/21-22/2024) -- \$315 / Rough and Final only (2/23/2024) -- \$175 - Both Seminars as one bundle (2/21-22/2024) -- \$475

Early Bird Registration for Non-NFSA members: Plan Review only (2/21-22/2024) \$630 / Rough and Final only (2/23/2024) \$350 - Both Seminars as one bundle (2/21-23/2024) \$950

After 2/6/2024 for NFSA members: Plan Review only (2/21-22/2024) \$365 / Rough and Final only (2/23/2024) \$225 / Both Seminars as one bundle (2/21-23/2024) \$525

After 2/6/2024 for Non-NFSA members: Plan Review only (2/21-22/2024) -- \$680 / Rough and Final only (2/23/2024) -- \$400 - Both Seminars as one bundle (2/21-23/2024) \$1,000

Location: Fire Station 14 – City of Medford. Fire Station 14 is located at 2208 Table Rock Rd., next to the Railroad Park. <https://www.google.com/maps/place/Station%2014%20Medford,%20OR%2097501>

Training Instructor: Jeffrey M. Hugo

Bio

Jeffery M. Hugo is the Vice President of Codes, Standards, Public Fire Protection and Training for the National Fire Sprinkler Association (NFSA). His department represents the mission of the NFSA, “To protect lives and property from fire through the wide-spread acceptance of the fire sprinkler concept” with the development and update of model codes, installation and maintenance standards, training, and education.

Jeff has been with the NFSA since 2005 and serves on several NFPA technical and IZCC committees. Jeff contributes to research, informal interpretations of codes, exam development, training, and regularly contributes building code related articles to publication such as NFSM, Fire Protection Contractor and other industry newsletters. Jeff resides in Michigan; he is a Michigan registered Building Official, Building Inspector, and Plan Reviewer since 1995.
